## **Completion Time**

10 months

## **Younglove's Services**

- Conceptual design
- Structural engineering
- General construction
- Construction management
- Slipform concrete construction
- Equipment installation

## **Calhoun, Georgia**

This facility is an addition to an existing Gold Kist feed manufacturing facility. It includes a slipformed concrete structure with five 35-foot-diameter bins for corn and soy meal storage, a receiving building with control room and sample storage room, and a 450-foot-long bridge for transfer conveyors to the existing mill. Receiving of corn and soy meal to the new storage is at 24,000 bushels per hour. Receiving of other ingredients for direct transfer to the existing mill and reclaim of corn and soy meal to the existing mill is at a rate of 6,000 bushels per hour.
