Bay State Milling  
Company

## **Size/Capacity**

400,000 bushel grain  
storage  
5,000 cwt flour mill

## **Completion Time**

13 months

## **Younglove's Services**

- Conceptual design
- Structural engineering
- General construction
- Construction management
- Slipform concrete construction
- Equipment installation

## **Indiantown, Florida**

Bay State Milling Company expanded its existing operation in Indiantown with a 5,000 cwt slipformed flour mill, slipformed grain storage, 15,000-bushel-per-hour receiving equipment, and byproducts loadout facility featuring a bulk weigher and pneumatic conveying equipment. The five-story flour mill was slipformed with exterior columns and clear-span beams. The 22-foot-diameter grain silos were fitted with steel cone hoppers and VFD-controlled screw feeders to allow blending.
