- Equipment installation

Mt. Vernon, Indiana

This soybean processing facility can process up to 2,100 tons per day of soybeans. It is a hot dehulling plant with preparation building, hexane solvent extraction building, meal storage and loadout, and oil storage and loadout.

Support facilities include a receiving scale/office, MCC/control room, boiler/maintenance shop building, and office building.

This facility was built adjacent to CGB's existing port facility on the Ohio River.
