7 months
Completed 07/2015

Younglove's Services

- Conceptual design
- Structural engineering
- General construction
- Construction management
- Equipment installation

Natchez, Mississippi

Younglove is pleased to have provided its turnkey construction services for the Louis Dreyfus Commodities barge loading facility in Natchez, Mississippi, which is Younglove's second facility for Louis Dreyfus Commodities on the Mississippi River. The Natchez terminal was built to supply grain to Louis Dreyfus Commodities' port facility in Port Allen, Louisiana, and will load 20 to 30 barges per year.

This facility includes a single truck receiving pit at 20,000 bushels per hour, three 49,000-bushel GSI cone bottom bins, one 600-foot-long InterSystems Model 48 barge loading belt conveyor, and one 60,000-bushel-per-hour Premier Fabrication spout.
