### Rosedale, Mississippi

Phase I of this project consisted of a high-speed loading/unloading facility with the ability to unload 250 semitrucks and load 3 barges per day. The facility can also dry grain at 12,000 bushels per hour. Phase II consisted of three large steel bins for long-term storage.

In addition to the above, Younglove also constructed the 37-foot by 72-foot main office, which serves as Louis Dreyfus Commodities' main grain merchandising office for the Mississippi Delta area.
