- Construction management
- Slipform concrete construction
- Equipment installation
- Tilt-up construction

Saginaw, Texas

Country Home Milling represents a consortium of Bay State Milling Company, Farmland Industries, and Southwest Grain Marketers, with Bay State acting as managing partner.

This facility was designed for two 6,000 cwt lines—one installed initially and one future.

Farmland dedicated a set of bins in their existing grain terminal, which is located on the adjacent property. Whole wheat is metered and then transferred to the mill.
