Zinpro Corporation

Size/Capacity

Undisclosed

Completion Time

Completed 11/2014

Younglove's Services

- Structural engineering
- General construction
- Construction management
- Slipform concrete construction
- Equipment installation

Shell Rock, Iowa

Younglove Construction teamed up with Zinpro personnel to develop plans for a new facility much larger than their existing plants. This facility utilizes a proprietary process to produce animal feed ingredients.

The facility includes a 50-foot by 60-foot by 128-foot-tall slipformed process tower for the ingredient storage and process area. The slipped tower was surrounded by over 24,000 square foot of precast area to house additional processing equipment. The electrical, mechanical, and site work scope were also managed by Younglove.
