Completion Time

16 months

Younglove's Services

- Structural engineering
- General construction
- Construction management
- Slipform concrete construction
- Equipment installation

Byhalia, Mississippi

This Cargill feed mill includes a slipformed concrete processing tower, 60,000-square-foot warehouse, adjacent office/employee welfare building, and remote 2,600-square-foot administrative/sales building. One rail spur also services the facility for unloading mill ingredients and other products.

The mill is a complete line facility with over 60 interior bins storing standard mill ingredients, textured feed ingredients, pellet mash, and finished feed for both bulk loadout and bagging. Processing equipment includes a hammermill, roller mill, flaking mill, two single-shaft mixers, three pellet mills, four different product screeners, two tender blenders, and two fully automatic bagging lines with robotic palletizers.
