Continental Grain  
Company

## **Size/Capacity**

40 tons per hour initial  
80 tons per hour future

## **Completion Time**

11 months

## **Younglove's Services**

- Structural engineering
- General construction
- Construction management
- Slipform concrete construction
- Equipment installation

## **Coffey, Missouri**

Designed for swine feed, this mill has one 40-ton-per-hour pellet line with fat at the die and room for a second 40-ton-per-hour system. The mill accommodates 1,010 tons of ingredients/mash and 376 tons of loadout storage. A separate grain silo slip holds 3,500 tons of shelled corn. Also included were a 300 hp hammermill, 6-ton mixer, truck receiving, and bulk truck loadout. Warehouse and office space, a boiler room, and a liquid storage area were part of the scope as well.
