- Construction management
- Slipform concrete construction
- Equipment installation

Duncombe, Iowa

This feed mill consists of a 51.7-foot by 34.7-foot by 120-foot slipform concrete mill tower, attached warehouse, roller mill building, and transfer conveyor of whole grain from the existing grain storage complex. The mill contains 1,188 tons of ingredient storage and 596 tons of finished feed storage.

Processing equipment includes rolled grain, batching, micro system, mixing, future pelleting operation, and dual driveways for receiving of feed ingredients and loadout of finished feed.

Use of the existing grain facility will provide whole grain to the new feed mill.
