

LOUIS RICH TURKEY FEED MANUFACTURING FACILITY

Owner

Louis Rich Co., Division
of Oscar Mayer

Size/Capacity

Pellets at 145,000 tons
annually (2-shift basis)

Completion Time

15 months

Younglove's Services

- Conceptual design
- Structural engineering
- General construction
- Construction management
- Slipform concrete construction
- Equipment installation

Goshen, California

This new facility includes a slipform concrete mill tower with storage capacity of 3,100 tons and a slipform concrete grain storage annex with storage capacity of 7,200 tons. Grain and other ingredients are unloaded from unit trains by a track scale with variable speed receiving system from 200 to 400 tons per hour.

The highly automated facility includes a central control room which provides visual access to most of the mill functions. This room contains several control panels and automated computer controls for batching and pelleting.

Pellets are loaded out to trucks by a shuttle drag conveyor system designed to minimize damage to the pellets and to operate virtually dust free.
