tion

Hagerstown, Indiana

This facility includes 29,000 square feet of pre-engineered steel buildings for receiving and warehouse/office structures, which surround a 160-foot-high slipformed concrete mill tower. The mill tower has 79 bins, with a total storage capacity of 3,200 tons.

The facility has one pelleting system and space to add a second system. An automated bagging system with palletizer is installed in the warehouse. Bulk loadout to trucks is controlled by a 4-ton automated weigh lorry system.
