

# CONAGRA BULK FLOUR STORAGE

## **Owner**

ConAgra, Inc.

## **Size/Capacity**

Six 2,500 cwt capacity bins

## **Completion Time**

5 months

## **Younglove's Services**

- Conceptual design
- Structural engineering
- General construction
- Construction management
- Slipform concrete construction

## ***Martins Creek, Pennsylvania***

A small concrete slipform structure for additional flour storage was added to an existing ConAgra flour mill. Younglove's scope of the work was to slip a structure 33.5 feet by 22.5 feet by 95 feet high with six 10.5-foot by 10.5-foot by 58-foot-high bins within the structure and a full headhouse over the bin deck.

The entire exterior surface of the mill tower was covered with a Dryvit insulation product. Three-inch styrofoam insulation was fastened to the wall; and a white finish coat was applied over the insulation, giving the exterior walls an insulation value of R-15.
